y @MatthiasMueringer

I'm a certified web developer with strong creative, analytical skills, and an eye-for-detail in building customized web pages. I possess business acumen and experience working in multicultural and cross-border teams, and bring especially skills in selling products and services that require explanation and perseverance. My strong analytical and goal oriented approach make me a good fit for any kind of team in the development process of innovative solutions.

MAJOR WEB DEVELOPMENT PROJECTS

MyFlix App https://myflix-movies-client.netlify.app/

A full-fledged full-stack web application. On the frontend with a beautiful responsive webpage with routing, rich interactions, several interface views, and a polished user experience. It was created with React and Redux for state management. On the backend a REST API will provide users with access to information about different movies, directors and genres. Users will be able to sign up, update their personal information, and create a list of their favorite movies. It was created with Node.js, Express and using modern API structure. A MongoDB database was created to store all the data.

Meet App https://koola123.github.io/meet/

It shows upcoming full-stack meetups around the world. A serverless, progressive web application (PWA) with React using a test-driven development (TDD) technique. The application uses the Google Calendar API and Serverless functions (AWS lambda) for the authorization server instead of using a traditional server to fetch the events.

SKILLS

Technical JavaScript, React, Redux Node.js/Express.js

TypeScript, Angular

React Native

HTML5/CSS3/SASS

Bootstrap
